Artist Statement       **The frenetic action of boats coming around a turn & jockeying for position seems chaotic & dance-like at the same time. To sailors, this maneuver is a nautical choreography: set steps & procedures create a rhythm and beauty all its own. My work is often inspired by patterns & motifs found in nature, this man-made situation presented quite a challenge. "Jibe Jive" exemplifies my use of multi-layered combinations of traditional and innovative painting techniques glazed of over special papers and surface textures to create an exciting & unique effect.**
